# NIMHANS INDEX FOR SLD

## NIMHANS Index for Specific Learning Disabilities – 2<sup>nd</sup> Revision (Hirisave, U., Kapur, M., John, A., Rozario, J., & Oommen, 2019)

This test is to be administered before the intelligence test. As per the Gazette of India document, published in 2018, (REGD. NO. D.L-33004/99) for certification of children with SLD, MISIC and WISC III are to be administered before NIMHANS SLD Index battery. The child must obtain an IQ of 85 and above on the Intelligence test. Gazette also mentions that the child's SLD must be rated on a severity scale.

Since MISIC does not have norms for children above 15 years, Wechsler's Adult Performance Intelligence Scale (WAPIS) may be considered for older children. When WISC III Indian adaptation is not available, WISC IV may be considered for the assessment of Intelligence of children. At NIMHANS, the procedure for arriving at severity is as follows:

Severity rating 1 is given if the child functions at two standards below the standard he is studying in currently. If the child functions at four standards or lesser below the standard he is studying in currently then he/she can be given the severity rating of 2. This applies to reading, reading comprehension, listening comprehension, spelling and arithmetic. Writing skills (copying and written expression) need to be rated on the severity rating scale of 0 and 1. It should be remembered to rate the severity of reading comprehension if the child has no disability. If the child's performance is just one standard or two standards below, it indicates learning difficulty. It is not possible to arrive at percentage of disability on this test as it is a criterion measure test. One of the government document, states that any person who is assessed to have Specific Learning Disability, would be considered to have more than 40% disability. (File no 38-01/2020-DD-III GOI, Ministry of Social Justice and Empowerment, dated 8.5.2020).

## NIMHANS INDEX FOR SPECIFIC LEARNING DISABILITY- REVISED (LEVEL-1 and LEVEL-2) (Hirisave U., Kapur M., John A., Rozario J and Oommen A, 2019)

### General Abilities:

Main's Intelligence Scale for Indian Children (MISIC) is used to assess the general intellectual functioning of the child. WISC-III UK (Indian adaptation) WISC IV can also be used.
